EXPERIENCE

Dewan IT, Mirpur — *Front End Developer*

OCTOBER 2023– DECEMBER 2023

Joined the company as an Intern Developer on a project basis.

- Collaborated with other Developers and integrated Fly Hub API with next.js and tailwindcss
- Build an OTA application for a Travel Agency, Where users can search for and book flight tickets

PROJECTS

Amader Bazar | Live   Source Code: Front End   Back End

- An E-commerce website that allows customers to browse, purchase, and track their orders
- Only the Admin can add, remove, or update any product via the Dashboard
- Users can see this previous order, favorite, and selected product on their profile
- Built reusable and Fully Typed components and API with TypeScript

TaskHub — *Team Project* | Live   Source Code

- Converted Figma to React, While UI/XI is constantly changing
- Participating in team collaboration/discussion
- Encountered Data Fetching issues with RTK Query's cache update and revalidation
- Validated form with React-hook-for with yup validator
